WEGO 360

Größe/Dimensions **L 140 W 90 H 40 cm** | Volumen/Volume **360 liter** | Zuladung/Capacity **75 kg** | Gewicht/Weight **10 kg**

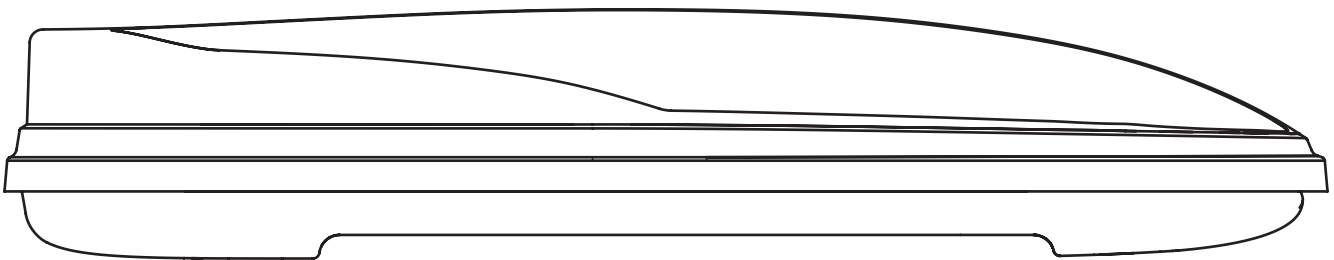

WEGO 450

Größe/Dimensions **L 180 W 82 H 46 cm** | Volumen/Volume **450 liter** | Zuladung/Capacity **75 kg** | Gewicht/Weight **14,8 kg**

WEGO 500

Größe/Dimensions **L 198 W 80 H 38 cm** | Volumen/Volume **500 liter** | Zuladung/Capacity **75 kg** | Gewicht/Weight **16,8 kg**

Požiadavky a odporúčania:

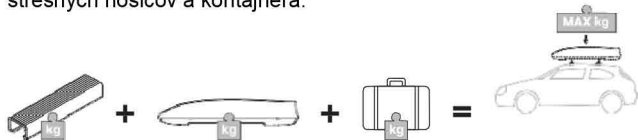

Po krátkej jazde v prvých a určitých časových úsekoch, v závislosti od stavu vozovky, je potrebné skontrolovať skrutkové spoje a upevnenie strešného boxu.

Pri montáži strešného boxu, najmä pri naložení, sa menia jazdné vlastnosti vozidla (náchýlné na bočný vietor, nakláňanie v zatáčkách a brzdenie).

Z dôvodu bezpečnosti ostatných účastníkov cestnej premávky az dôvodov úspory energie by sa mal strešný box v čase nepoužívania demontovať zo strechy.

Je potrebné dodržiavať informácie uvedené výrobcom vozidla týkajúce sa prípustného zaťaženia strechy.

Zvážte náklad v boxe, pretože prípustné zaťaženie strechy je kombináciou skutočného zaťaženia, pripočítaním hmotnosti strešných nosičov a kontajnera.

Strešný box musí byť namontovaný v smere jazdy bez vzostupnej línie sklonu, aby sa predišlo zvýšeniu zdvíhacích síl.

POZOR:

Je veľmi dôležité dodržiavať pokyny na montáž a použitie.

Upevnite správne box a pravidelne doťahujte a kontrolujte Dotiahnutie spojovacích prvkov počas cesty.

Tento návod si bezpečne uschovajte.

Batožinu strešného boxu správne a bezpečne zaistite.

Je dôležité udržiavať zariadenie v dobrom prevádzkovom stave.

Requirements and recommendations:

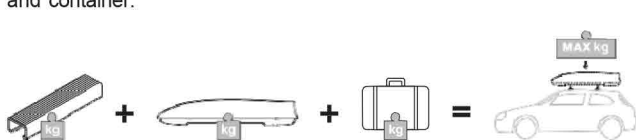

After a short travel at first and specific time periods, depending on the road conditions, the bolt connections and the roof container fixing have to be checked.

The driving behavior of the vehicle changes (vulnerability to side winds, cornering and breaking behavior) when the roof container is mounted, especially when loaded.

By reasons of safety of other traffic participants and for matters of energy saving, the roof container should be taken off during periods of no use.

The information stated by the vehicle's manufacturer, concerning the permissible roof load, has to be followed.

Consider the weight of the container, since permissible roof load is a combination of the actual load, adding the weight of the roof racks and container.

The roof container has to be mounted in direction of the travel without a positive angle of incidence, to avoid any increase in lifting forces.

Warning:

It is very important to follow the instructions of fitting and use;

Tighten and check the fixing devices correctly and regularly during travel;

Keep this instruction manual safely;

Secure the roof container load correctly and safe;

It is important to maintain the equipment in good working order.
